

Awakening Flow

AWAKEN YOUR UNLIMITED, INTUITIVE SELF

Mission Statement

To up-level consciousness and frequency to peace, bliss and joy. Every soul matter's; self-mastering and unlocking your inner creative, authentic self and goddess nature means you can shine and serve all, and in so doing, permitting others to shine also

Code of Ethics

I offer science and spirituality-based well-being and self-care consultations, courses, talks and methods. My business aims to empower customers and clients to approach and perceive their mindset, energy and soul with reverence and know they have the power to choose its state, rather than passively let it and the environment impact their inner state and peace, i.e. gain self-mastery.

My ambition is to continuously develop and learn with the most credible sources and teachers and innovate in this space. Thus, this document and training will be in the process of constant development and review as necessary. My style and methods will aim to bring a sense of lightness and joy, but my approach will, in no way, distract from the seriousness of the subject matter or the individual and their concerns. Thus, this approach shall be made with discernment.

I intend to have ethically driven principles and policies which are reflected in the following values:

1. Responsibility:

Clients First

I am committed to placing my clients and customers well-being at the centre of my work. I acknowledge that this work can unduly influence people and persons due to the autonomy and type of services offered. I am committed to ensuring that the trust placed in my organisations by customers is not abused, the power of influence adequately managed, controlled and duty to others always integral to work.

Do no harm & prevention

I commit to avoiding harm and prevention of harm to persons and people, and the general public. I honour this work and continuously monitor methods, processes and feedback to ensure that it stays central to the business. I will create and observe professional boundaries between myself/employees and my customers to ensure trust and respect is created and maintained to offer professional standards.

Client Care

I am committed to ensuring the highest good and support for my clients while maintaining professional standards. If problems arise or I feel a subject or emotional state is beyond my professional capacity, I will seek help. This support could range from my mentors and the Institute of Intuitive Intelligence for guidance or refer to an appropriate body (e.g. counsellors, external professional bodies). If a client is working with or begins to work with a medical or psychological professional, I will ask for written and/or verbal consent (as appropriate on the severity of the case) to work with an individual. It must be acknowledged that any services gained by my business do not and cannot replace those of professional medical or psychological services.

Integrity & professional standards:

I am committed to maintaining the high standards and integrity of the association and memberships that I am a part of, including, The Institute of Intuitive Intelligence and The British Psychology Society and the IICT code of ethics.

I am committed to living in congruence with my beliefs and values and deepening my practices.

2. Empowering Clients:

Hope, Space & Recovery

Our focus will always be to hold space, offer hope and empower persons and people to self-mastery and not create an environment of learned-self helplessness. Instead, I will provide methods and teachings that help people take responsibility for their mindset, energy, body and soul. This business aims to hold space and provide a structure for them to enable this growth and empowerment to self-mastery and intuitive and spiritual growth. This organisation will not create teachings and methods that nudge customers into thinking they need to stay with my work out of fear; instead, they will have free will to choose to participate and continue with my work and any membership offered.

3. Professional Excellence

I am committed to ongoing personal, professional development and self-care to offer the best standards and teaching to my clients. I will offer science-based, peer-reviewed research and acknowledge my learning and teaching lineage. I also commit to stay up to date with any legal or regulatory policies applicable to this business.

4. Beyond Labels: Inclusivity, equality and diversity

I am committed to offering my services to all and empowering all, especially those who may feel marginalised or lack privileges. Behaviour or judgments that may directly or indirectly exclude, cause harm, offence by staff or other customers and members of this business shall be discussed, firstly informally and then formally. This business reserves the right to stop providing services to individuals who commit major offences.

5. Data Protection and confidentiality

All customer and client data shall be held and dealt with following the EU General Data Protection Regulation (GDPR), which has become part of the UK's Data Protection Act in 2018. All customer information and conversations shall be confidential unless they express harm to themselves or others, in which case appropriate support will be sought.
